

SS205-H System for Liquid Coffee Dispensers

The CunoOCS® line of filtration products are carefully designed to protect beverage equipment, provide consistent beverage quality, and ensure seamless beverage service.

The stainless steel housing provides durability in difficult environments and withstands even extreme water hammer.

The compact footprint allows the unit to be installed snugly behind the beverage unit or neatly under a cabinet.

Proper fit of the cartridge is assured with simple hand tightening.

3/8" vertical connections are compatible with common equipment and tubing installations.

Unit is FDA, CFR-21 compliant for use in all food and beverage applications.

The SS205-H system comes standard with a specially designed premium graded density and GAC cartridge.

Sediment, Chlorine Taste and Odor Reduction Cartridge

SS205-H system with 205H

Capacity: 2,000 gallons (7,570.8 liters) or 266 cups/day*

Features

- Built-in 5 micron prefiltration
- Proprietary GAC blend
- Chlorine taste and odor reduction
- Dedicated cartridge design

Benefits

- Suitable for water conditions with heavy dirt load
- Enhances beverage clarity
- Reduces maintenance caused by clogged valves and orifices
- Enhances beverage quality over the life of the filter
- Allows efficient operation in high water pressure areas
